

Listening Station „Blümchen“

The „listening experience“ Blümchen is our answer to many customer inquiries for child-friendly listening audio stations. The robust one-hand headphone is held with a magnet on the „nose“ and can be safely returned to its starting position. When you lift the handset, the desired audio file starts automatically. The two built-in control buttons (stainless steel) enable the navigation through the different audio files. The play sequence can be customized with a playlist. On request we build your own customized listening station.

The listening station Blümchen invites to stay and impart knowledge. It can be used for the following application: Waiting rooms, adventure parks, exhibitions, museums, playschool, kindergarten, nursery, etc.
